SmartVIU

Digital Signage & Interactive

What we do is...

Powerful digital displays solutions for your business.

We design, install and manage Digital Signage Networks (DSN) that delivers a unique experience with engaging contents to obtain immediate results from your customers.

Our state-of-the-art products and services are shown in successful companies from Dominican Republic, from financial, insurance and hospitality businesses to restaurants and athletic clubs.

Steps to start your system

We make a research in your business and present you a high-end proposal for the digital screens distribution and its costs.

Once approved the design, our team proceed with the devices installation, cloud system setup and initial contents design.

Your team receive a training to schedule and update your contents from your offices.

Features & included services

- High Definition displays with 1080p (HD or 4K) with thin frame design.
- Playback for full-HD digital video, still graphics and HTML5 contents.
- Multi-zone layouts to multiply your content delivery mixing text, images and video in one screen.
- Devices provided by global market leader brands in digital media players.
- Multi-screen video walls in any size and layout.
- Optional interactive touchscreen displays.
- Touchscreen applications design.
- Operates with local network or Wi-Fi connection.
- On-the-cloud operation allows you to program or update your contents from anywhere.
- Content scheduling software and training included.
- Hosting and maintenance of your digital network.
- Hardware, cabling, network setup and installation included.

Content creation & management

We design, animate and program digital signage contents that fits your needs.

- Visual styling for your communications based in you brand identity.
- High Definition 2D animation in every ad.
- Standard flat ad conversion to animated video (created from your agency Photoshop creative files.)
